## OBJECTIVE

---

To obtain a full-time web development position working with a variety of front-end and or back-end technologies.

## EDUCATION

---

### DigitalCrafts Full-Stack Immersive Web Development Boot Camp (Nov 2021):

Rigorous 4-month course that introduced and taught students multiple modern front-end and back-end technologies such as, Python, JavaScript, Node.js, React, and PostgreSQL.

## SKILLS

---

- Knowledgeable of React framework
- Multiple projects using JavaScript (Node.js)
- PostgreSQL
- HTML, CSS
- Ability to communicate with co-workers to complete a goal more efficiently
- Great time management and organization
- Great learner, always open to criticism as it will only make me a better developer.

## PERSONAL PROJECTS

---

### Footlocker Clone:

Code: <https://github.com/RonaldDavenport/footlockerclone2/tree/main>

Walkthrough: <https://www.youtube.com/watch?v=bWh9Z7BFSp4>

- Used React framework along with Redux and Node.js to create a Footlocker E-Commerce Website.
- Fetched data from a database and presented it onto the client side for users to interact with.
